Examples are restaurant food, fast food, and take-out foods.

Yes No

9. Do you eat slowly and respond to your body's hunger and fullness signals?

Yes No

10. Do you keep a record of everything you eat?

Yes No

Making a Change

Please fill out this at the end of your virtual HE 101 class.

Looking at your Healthy Eating Checklist (page 1), how many of your answers were **Yes**? Each **Yes** is a healthy eating habit you are already doing well. Well done!

Now go through the questions you answered **No** to. Choose one that you would like to change to a **Yes** and set a SMART goal to achieve it.

I choose to make a change that relates to question # _____.

My SMART Goal:	
Specific: How will I do it?	
Measurable: How will I measure it? How much, how many?	
Attainable: Is this realistic for my life? Am I at least 70% confident I can do this?	
Rewarding: Is this something I want to do?	
Timely: When will I start? How often will I do this?	

****Dietitian Tip**:** To succeed with your goal, you may need to remind yourself to stay accountable. Some ideas for how you can remind yourself are:

- Set reminder on your phone through a reminder or goal tracking app.
- Write it on a sticky note and paste on your desk, fridge or bathroom mirror.
- Tell a friend, partner, co-worker or family member. Ask them to check in often!
- Tell your Registered Dietitian or Doctor, and have them check in at each appointment.
